Design Features

- Interchangeable reflectors to achieve different beam distributions.
- Minimum Trim reveals are 0.12" thick.
- Multiple reflector distribution patterns available: pinhole trim with Narrow Spot (NS), Narrow beam (N), Medium beam (M), and Wide beam (W).
- Designed for ceiling thickness up to 1-1/4".
- Adjustable trims allow engine to be angled 0°~40° tilt with a 356° rotation for precise, lockable aiming.
- Wall Wash trim with angled slope reflector. Molded spread lens for great uniformity.
- Dimming capability is standard with 0-10V dimmer switches.
- Optional Lutron Hi-lume 1%, LED drivers are available. Lutron drivers provide flicker-free, smooth, continuous dimming down to 1%. (Contact factory for dimming system requirements)
- The ICED9541 luminaire is listed as Type IC and is suitable for direct contact with insulation.
- Certified to IESNA LM-79: Approved Method for the Electrical and Photometric Testing of Solid State Lighting. The U.S. Department of Energy (DOE) verifies product test data and results. LED chip sets are in compliance with LM80.
- cETLus Listed.

Trims: Various finishes available for straight (ST), Adjustable (AJ), Adjustable Pinhole (PAJ) and wall wash (WW) down lights.

TML424RST

Straight down symmetrical reflector.

TML425RAJ

Angle cut reflector adjustable from 0°~40° for accurate aiming with a screw driver from below ceiling. This allows easy, targeted illumination of desired areas.

TML434PAJ

Black or White Pinhole aperture with angle cut reflector adjustable from 0°~40° for accurate aiming with a screw driver from below ceiling. This allows easy, targeted illumination of desired areas.

TML425RGWW

Wall Wash Trim with a fixed 40° angle provides ideal illumination of vertical and horizontal surfaces.
